## Experience

○ 2023- 2024

Agami Technologies greater Noida

### Software specialist

During my tenure as a software trainee at Agami Technologies, I immersed myself in practical software development tasks like working on whole module, bug fixing etc., I and collaborating with a diverse team. These Challenges pushed me to think creatively, and celebrating project successes was rewarding. Grateful for mentorship, I now feel equipped for future endeavors in software development. During my this journey i majorly working on marketing module, editor module, code optimization, query optimization and bug fixing

○ 2022- 2023

Postulate infotech Koimbatore Tamilnadu India

### Full Stack web developer Intern

During my full stack internship, I worked on developing web applications using a combination of front end technologies like HTML, CSS and Javascript and backend with node.js. I collaborated with a team to design and implement features, conducted testing and optimized performance. Additionally, I gained hands-on experience in database management using MongoDB.

## Projects

### MLOFLO

[mloflo.com](https://mloflo.com)

mloflo is a cutting-edge mortgage CRM software designed to streamline the mortgage process for loan officers, borrowers, realtors, and processors. With customizable success goals, comprehensive checklists, daily reminders, follow-ups, and performance tracking, mloflo empowers mortgage professionals to efficiently manage their workflows. Our platform is built on MERN (MongoDB, Express.js, React.js, Node.js) technology, ensuring scalability, flexibility, and robust performance. As a proud contributor to this project, I've played a significant role in its development, leveraging my expertise to enhance its functionality and user experience.

### Schezy

[Schezy.com](https://schezy.com)

Schezy is a school management system designed to simplify school operations, including managing student information, attendance, grades, and communication with parents and staff.

I contributed significantly to its development by implementing features such as student pricing plans for student seats, a gallery plan for school events, a profile image cropper, and CAPTCHA for enhanced security, along with addressing various bugs to improve overall functionality.
